1. Benefits include correct, legible, and bar-coded turn-in documents and pre-populated NSN information.
2. If the generating activity does not have an automated capability to create turn-in documents, ETID is recommended and provides ease of use for Generators and DLA DISPOSITION SERVICES Sites.
3. For instructions on how to gain access to ETID:
www.dla.mil/DispositionServices/Business/TurnInProperty.aspx

C. Provided below are required entries on the DD Form 1348-1A.

(Excerpted from DLM 4000.25-1):

<u>FIELD LEGEND</u>	<u>RECORD POSITION</u>	<u>ENTRY AND INSTRUCTIONS</u>
Document Identifier	1-3	Perpetuate from the source document. For locally determined excesses generated at a Base, Post, Camp, or station, assign a DI code as determined by Service/Agency (S/A) procedures.
Stock Number (NSN)	8-22	Enter the stock number being turned-in. For subsistence items, enter the type of pack in RP 21. If LSNs are the only option, the number must contain the FSC, NATO Code, and noun/nomenclature and/or part number. The official NSN is required for Critical FSCs listed in Enclosure 8. Official NSNs are also necessary for MLI/CCLI and Hazardous Property See Block 25.

Quantity	25-29	Enter the quantity being turned in to the DLA Disposition Services. See Block 26. (If necessary quantity should be indicated by zeros.) Quantities for DEMIL required property must be reported to the DLA Disposition Services in readily verifiable quantities to preserve the integrity of the audit trail for the item.

Demilitarization	65	Enter code assigned as required by DOD 4160.21-M-1 (Section 4). NOTE: When demilitarization has been accomplished prior to transfer to the DLA Disposition Services, the appropriate DEMIL certification, as required by DOD 4160.21-M-1, must be reflected in Block 27, or as an attachment to the form.
Supply Condition	71	Enter applicable code from Section 4, this handbook.
Unit Price	74-80	Enter the unit price for the NSN or part number in RP 8-22.

- D. Generating activities are responsible to ensure that proper NSN/LSNs, Supply Condition Codes (SCC), and Demilitarization (DEMIL) Codes are assigned. If no valid DEMIL Code, then a clear-text DEMIL statement is required.

6.1 DEMILITARIZATION CODES:

http://www.dtic.mil/whs/directives/corres/pdf/416028m_vol2.pdf

CODES	EXPLANATION
A	Non-USML/Non-CCLI – No DEMIL or TSC Required. Department of Commerce (DoC) may impose licensing requirements to certain destinations.
B	USML Items – Mutilation (MUT) to the point of scrap required worldwide. DLA Disposition Services shall store for reutilization and mutilate those items declared by the DOD as having no foreseeable DOD reutilization value.
C	USML Items – DEMIL required. Demilitarize installed key point(s) as DEMIL code “D.”
D	UML Items – DEMIL required. Destroy item and components to prevent restoration or repair to a usable condition.
E	DOD DEMIL Program Office (DDPO) reserves this code for their exclusive-use only. DEMIL instructions shall be furnished by the DDPO.
F	USML Items – DEMIL required. Item managers, equipment specialists, or product specialists shall furnish special DEMIL instructions.
G	U.S. Munitions List (USML) Items – DEMIL required – ammunition and explosives (AE). This code applies to both unclassified and classified AE
P	USML Items – DEMIL required. Security Classified Items.
Q	CCLI – MUT to the point of scrap required outside the United States. In the United States, MUT requirement is determined by the DEMIL integrity code (IC) (see Enclosure 4 for a description of DEMIL ICs) and MUT is required when the DEMIL IC is “3.” TSC are required in the United States.

Note: DLA Disposition Services does not accept DEMIL codes G or P property.

- E. ***The following link may be used for assistance in obtaining the correct NSN, or for explanation of the SCC, DEMIL code, or Disposal Authority Code (DAC):** www.dla.mil/DispositionServices/Offers/Disposal/turnin/usable.aspx
- F. In addition to requirements listed above, the DTID must also clearly indicate:
1. Category of property (such as foreign purchased, MAP) and reimbursement data, if Applicable (DTIDs which do not contain reimbursement data will be processed as non-reimbursable).
 2. Value and list of component parts that have been removed from major end items of equipment OR a copy of the Limited Technical Inspection (LTI) form showing the nature and extent of repair required.
- G. If the generating activity has batch lot property, the following data must be included on the DTID for each lot. Property requiring special handling (e.g. MLI/CCLI, Special Handling property, see DoDM 4160.21 Vol 4, pilferable or hazardous property) may not be batch-lotted.
1. FSC/FSG followed by the word BATCH.
 2. Generating Activity Assigned DTID Number.
 3. Quantity is optional. If blank, DLA Disp Svcs shall estimate.
 4. Total acquisition value of the lot.

5. Shipping point, DOD Activity Address Code (DODAAC), or activity in-the-clear address.
 6. Ship to DLA Disp Svcs, DODAAC, or activity in-the-clear address.
 7. Certification as follows: "I certify that this lot is in compliance with current disposal policy" followed by the date, signature, and printed or typed name of the certifying individual.
- H. Some types of property require special processing for disposal turn-in. In such cases there may be additional certifications required to accompany the DTID.

7.0 USABLE PROPERTY TURN-IN:

- A. Usable property shall be turned in as individual line items with their assigned, valid National Stock Number (NSN). In some cases it is acceptable to group like items on the same DTID (e.g., one DTID for 50 computers with the same NSN and condition code). When in doubt, seek assistance from your local DSR.
- I. At minimum, record positions 8 through 22 of the DTID (DD 1348-1A) should contain a Local Stock Number (LSN) consisting of a Federal Supply Class (FSC), NATO Codification Bureau Code, and noun/nomenclature and/or part number if no valid NSN exist. Generators may use the internal LSN Master List found on the following DLA Disposition Services web page under Documentation Assistance:
www.dla.mil/DispositionServices/Offers/Disposal/turnin/usable.aspx
- B. Due to national security concerns, some federal stock classes (FSC's) require a higher degree of documentation when being turned in under a local stock number opposed to a cataloged national stock number. These critical FSCs must be turned in with following information on or attached to the DD 1348-1A
 1. Appropriate FSC
 2. Manufacturer name and valid part number
 3. Nomenclature which accurately describes the item
 4. End item application
 5. Clear text statement explaining why the NSN is not included

7.3 ACCEPTED SUPPLY CONDITION CODES

CODE	TITLE	DEFINITIONS
A	Serviceable (Issuable w/o Qualification)	New, used, repaired or reconditioned material that is serviceable and issuable to all customers without limitation or restrictions. Includes material with more than 6 months shelf life remaining.
B	Serviceable (Issuable with Qualification)	New, used, repaired or reconditioned material that is serviceable and issuable for its intended purpose which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes material with 3 through 6 months shelf life.

CODE	TITLE	DEFINITIONS
C	Serviceable (Issuable with Qualification)	Items which are serviceable and issuable to selected customers, which must be issued before Condition A and B material to avoid loss as a usable asset. Includes material with less than 3 months shelf life remaining.
D	Serviceable (Test/Modification)	Serviceable material requires test, alteration, modification, conversion or disassembly. This does not include items, which must be inspected or tested immediately prior to issue.
E	Unserviceable (Limited Restoration)	Material, which involves only limited expense or effort to restore to serviceable condition and which is accomplished in the storage activity where the stock is located.
F	Unserviceable (Repairable)	Economically reparable material, which requires repair, overhaul, or reconditioning (includes reparable items which are radioactively contaminated).
G	Unserviceable (Incomplete To Issue)	Material requiring additional parts or components to complete the end item prior to issue.
H	Unserviceable (Condemned)	Material which has been determined to be unserviceable and does not meet repair criteria (includes condemned items which are radioactively contaminated).
S	Unserviceable (Scrap)	Material that has no value except for its basic material content. No stock will be recorded as on hand in Condition Code S. This code is used only on transactions involving shipments to DLA Disposition Services. Material may not be transferred to Condition Code S prior to turn-in to DLA Disposition Services if material is recorded in Condition Code A through H at the time material is determined excess. Material identified by NSN may not be identified by this Condition Code.

NOTE: For a complete listing of Supply Condition Codes (including those codes not used in reutilization and marketing), see DOD 4000.25-2-M, Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP).

7.5 SCRAP TURN-IN:

A. Scrap is defined as material that has no value except for its basic material content.
If property is recognizable as an end use item, it is probably not scrap.

***If the item has a valid NSN the item must be turned in as an item and NOT as scrap.**

B. The turn-in document (DD Form 1348-1A) for scrap will include:

1. Scrap Condition Code must be "S"

8.0 TURN-IN DOCUMENTATION AND INSTRUCTIONS FOR PROPERTY REQUIRING SPECIAL PROCESSING:

DODM 4160.21 Volume 1, Enclosure 4 lists the detailed guidance for disposition and disposal of over 70 items requiring special handling. It is recommended that generators coordinate turn-in of these items with servicing DLA Disposition Services' site personnel (i.e., DSR) as property requiring special handling oftentimes requires additional instructions and/or certifications to accompany the DD Form 1348-1A.

The following list includes those items most commonly generated for disposal to DLA Disposition Services that require special handling/additional documentation.

1. QUALIFIED RECYCLING PROGRAM (QRP)

- a. The Qualified Recycling Program (QRP) is a U.S. military installation wide, facility-managed and run recycling program aimed at
 - i. Pollution prevention
 - ii. Minimizing environmental impacts (i.e. recovering recyclable materials from solid waste disposal streams)
- b. Qualifying recyclable materials are collected and segregated from other solid waste materials by the generating unit or activity, where they are then either sold direct via public sale or through established scrap sales programs (DLA Disp Svcs). Net proceeds from the sale of these recyclable materials are then deposited into the installation's QRP account.

Fillable **MDAS Certification**:

<https://demil.osd.mil/documents/mdas.pdf>

Or Inert Certificate: <https://demil.osd.mil/documents/InertCertificate.pdf>.

MDAS/Inert Certification must be included or attached to the DD Form 1348-1A and on each container/property.

*Sample of MDAS and Inert Certification documents provided on

 - III. Each signatory must ensure the chain of custody was maintained before signing the explosives safety documentation.
- d. The following MPPEH will be accepted by DLA Disposition Services as long as the MPPEH is certified **Inert** and includes an [Inert Certification](#):
 - Small arms and light weapons (complete weapon)
 - Barrel assembly and upper receiver
 - Ammunition pouches/outer tactical vests/individual load-bearing equipment/Modular Lightweight Load Carrying Equipment (MOLLE)
 - Ammunition magazines and clips
